

Environmental POLICY

As a business we will:

- Ensure we have a wide environmental aspects view including: flora, fauna, water, community and cultural interests
- Provide innovative and efficient operations focused on reducing, reusing and recycling to minimise our environmental footprint
- Ensure compliance with all requirements of relevant regulators and accreditors
- Identify potential pollution or other impacts to the environment when designing, planning and delivering work, implementing effective controls
- Enhance the skills and behaviours of our people through environmental training
- Work closely with our subcontractors and suppliers to ensure they meet our expectations
- Drive continuous improvement by setting objectives and targets to measure, manage and improve outcomes where needed

Our people will lead by always:

- Proactively identifying environmental risks and opportunities
- Stopping an activity if they believe it could cause harm
- Seeking to minimise long-term environmental impact of our activities
- Looking for ways to do things better
